

ABSTRACT

A cap having a visor and a passageway for a ponytail is described herein. The cap is composed of a body having a front portion, a back portion, side portions, and a lower peripheral edge. The back portion of the cap body includes an inverted U-shaped opening to define the passageway. A sweatband is coupled to the lower peripheral edge of the cap body, wherein the sweatband includes an elastomeric section. According to one exemplary embodiment, the visor can be obliquely coupled to a substantial portion of the lower peripheral edge. Also, in one exemplary embodiment, ribbons can be coupled to opposite ends of the passageway. The ribbons may be used for tying the ponytail or tied together for decorative purposes.
